First reprinting, 1961, Johnson Reprint Corporation

CONTENTS

No. 1. MARCH 1941

PAGE

GUST KROGH AND ERIK ZEUTHEN, The mechanism of flight preparation in some insects. (With Eight Text-figures) 1

WARING, F. W. LANDGREBE AND R. M. NEILL, Ovulation and oviposition in Anura. (With Three Text-figures) 11

N DAWES, The melanin content of the skin of *Rana temporaria* under normal conditions and after prolonged light- and dark-adaptation. A photometric study. (With Five Text-figures) 26

HOLMES, R. J. PUMPHREY AND J. Z. YOUNG, The structure and conduction velocity of the medullated nerve fibres of prawns. (With One Text-figure) . 50

NNETH MELLANBY, The body temperature of the frog. (With Four Text-figures) 55

C. CROMBIE, On oviposition, olfactory conditioning and host selection in *Rhizopertha dominica* Fab. (Insecta, Coleoptera). (With One Text-figure) . 62

WARING AND F. W. LANDGREBE, On chromatic effector speed in *Xenopus* and *Anguilla* and the level of melanophore expanding hormone in eel blood. (With Nine Text-figures) 80

No. 2. AUGUST 1941

N DAWES, Notes on the distribution of pigment granules in the retinal pigment epithelium of light- and dark-adapted *Rana temporaria*, and on the nature of the eye pigment in the frog and the ox 99

KESAVA PANIKKAR, Osmotic behaviour of the fairy shrimp *Chirocephalus diaphanus* Prévost 110

DEJDA WALOFF, The mechanisms of humidity reactions of terrestrial isopods . 115

NEST BALDWIN AND R. A. BEATTY, The pigmentation of cavernicolous animals. I. The pigments of some isopod crustacea 136

A. BEATTY, The pigmentation of cavernicolous animals. II. Carotenoid pigments in the cave environment 144

R. ERICHSEN JONES, The effect of ionic copper on the oxygen consumption of *Gammarus pulex* and *Polycelis nigra* 153

W. LANDGREBE, The role of the pituitary and the thyroid in the development of teleosts 162

. ERICHSEN JONES, A study of the relative toxicity of anions, with *Polycelis nigra* as test animal 170

W. BENTLEY, D. L. GUNN AND D. W. EWER, The biology and behaviour of *Ptinus tectus* Boie. (Coleoptera, Ptinidae), a pest of stored products. I. The daily rhythm of locomotory activity, especially in relation to light and temperature 182

No. 3. JANUARY 1942

PAG

R. F. Ewer, On the function of haemoglobin in *Chironomus*. (With Three Text-figures) 19

C. G. Butler and D. J. Finney, The influence of various physical and biological factors of the environment on honeybee activity. An examination of the relationship between activity and solar radiation 20

G. P. Wells, The action of potassium on echinoderm, molluscan and crustacean muscle. (With Six Text-figures) 21

C. A. G. Wiersma and C. H. Ellis. A comparative study of peripheral inhibition in decapod crustaceans. (With Two Text-figures) 22

E. N. Willmer, Carbohydrate metabolism of chick fibroblasts in vitro. (With Nine Text-figures) 23

Eric Ponder, On properties of the red cell ghost. (With Two Text-figures) . 25

M. L. Johnson, The respiratory function of the haemoglobin of the earthworm. (With Two Text-figures) 26

D. L. Gunn and H. S. Hopf, The biology and behaviour of *Ptinus tectus* Boie. (Coleoptera, Ptinidae), a pest of stored products. II. The amount of locomotory activity in relation to experimental and to previous temperatures. (With Six Text-figures) 27

D. W. Ewer and R. F. Ewer, The biology and behaviour of *Ptinus tectus* Boie. (Coleoptera, Ptinidae), a pest of stored products. III. The effect of temperature and humidity on oviposition, feeding and duration of life cycle. (With Four Text-figures) 2

H. Waring, F. W. Landgrebe and J. R. Bruce, Chromatic behaviour of *Scyllium canicula*. (With Five Text-figures) 3
